

Course Title	e-BUSINESS
Course Code	BUS 313
Course Purpose and Objectives	This course aims to impart understanding about e-Businesses and their operations over the internet. Participants will learn about the inception and development of e-business, distinguish and compare e-commerce with conventional commerce, and examine the hurdles encountered in internet-based business activities. Additionally, the course covers evaluation of key e-business domains including marketing, finance, sales, technology, security, and legal considerations. Students will explore different methods for creating a website.
Learning Outcomes	<ol style="list-style-type: none"> 1. Evaluate the fundamental principles of e-commerce, assess the development of e-business in the context of the digital revolution, and critique their evolution over time. 2. Describe the characteristics that distinguish different e-commerce business models, using classification to differentiate among them. 3. Summarize the technological foundation necessary for e-commerce and identify potential security challenges associated with these technologies. 4. Outline the steps involved in website creation, emphasizing the selection of technologies essential for supporting online marketing and procurement in an e-commerce setting. 5. Critically analyze various e-commerce enterprises by comparing and contrasting their use of technology and e-commerce concepts, and appraise their effectiveness in the digital marketplace.
